Billing Assistant

Get paid faster, with fewer denials.

Revenue cycle management shouldn't drain your team's time, or your bottom line. The EVAA Billing Assistant is your AI-powered partner for insurance verification, claim accuracy, and streamlined billing workflows. By automating the most time-consuming tasks and giving your staff an intuitive dashboard to work from, EVAA helps your practice stay ahead of denials and keep cash flowing.

Key Benefits

- **Improve Transparency:** Automatic eligibility checks help patients understand their benefits up front, reducing billing delays.
- **Boost Efficiency:** Automate posting and claim submission, freeing staff for higher-value tasks.
- **Accelerate Reimbursements:** AI-powered claim scrubbing speeds up payments and reduces denials.
- **Recover Revenue Faster:** Smarter denial management minimizes revenue leakage and shortens days in A/R.

EVAA Billing Assistant Features

- ✓ **Insurance Eligibility Verification:** Runs automatic eligibility checks in the background for scheduled patients, saving staff time and improving financial clarity for patients.
- ✓ **Payment Posting:** Automates posting of ERAs and EOBs directly into your PMS, accelerating cash flow while reducing manual work.
- ✓ **Claims Submission:** Submits claims with AI-driven accuracy and integrated documentation for faster reimbursements and fewer denials.
- ✓ **AR/Denials Management:** Flags and categorizes denied claims, prioritizes A/R by payer behavior and aging, and recommends next steps to streamline resolution.
- ✓ **Unused Benefits:** Identify patients with unused vision or medical benefits and surface timely outreach opportunities based on appointment history and plan expiration.

Smarter practice support.
Seamless patient care.

MaximEyes AI, powered by EVAA, brings next-generation artificial intelligence to every corner of your practice. From the front desk to exam charting, to billing, EVAA works behind the scenes to automate routine tasks, reduce errors, and keep your staff focused on patient care.

Why You Need Eye Care Practice Automation

- **Save Time:** Automate repetitive tasks across the practice.
- **Reduce Errors:** AI-driven accuracy in documentation, billing, and data capture.
- **Boost Revenue:** Faster claims, fewer denials, more dollars collected.
- **Improve Patient Experience:** Shorter waits, seamless communication, modern convenience.
- **Scale with Ease:** HIPAA-compliant, secure, and built to grow with you.

Why Practices Choose EVAA

- **Fully Integrated:** Unlike add-on tools, EVAA is built for eye care and works seamlessly with your EHR—no double entry, no juggling systems.
- **Purpose-Built for Eye Care:** While competitors adapt generic AI, EVAA was designed specifically for optometry and ophthalmology practices.
- **Beyond Messaging:** Other “virtual assistants” stop at answering FAQs. EVAA also verifies insurance, books appointments, checks eyewear orders, and handles balances—making it a true front desk partner.
- **HIPAA-Compliant & Secure:** Consumer chatbots can’t guarantee compliance. EVAA keeps patient data safe and meets the highest security standards.
- **Practice-Centered Customization:** Configure preferences and train EVAA on your workflows, so responses feel personalized—not robotic.
- **Smarter Practice Support, Seamless Patient Care:** Modernize your practice and improve your bottom line. Scale with Ease: HIPAA-compliant, secure, and built to grow with you.

The EVAA Suite

EVAA Virtual Assistant

Your always-on assistant.

A 24/7 front desk partner for messaging, FAQs, scheduling, order status, balances, and more.

EVAA Billing Assistant

Get paid faster, with fewer denials.

A revenue cycle powerhouse that verifies insurance eligibility, submits claims, posts payments, manages denials, and generates audit-ready reports—making your billing process faster, cleaner, and more profitable.

EVAA IntelliScan

Intake, automated.

Smart information capture that auto-enters patient information directly into your EHR, speeding up check-ins and reducing data entry errors.

EVAA Scribe

Your notes, already done.

An AI-powered clinical assistant that listens, drafts, and writes SOAP notes directly into the EHR—filling in all the right fields and freeing doctors from hours of typing.
